

EQUINOR MARINER FIELD

KAEFER UK & Ireland joined forces with Wood Group to deliver comprehensive industrial support services for Equinor’s Mariner Field.

This collaborative effort aimed to optimise operations and maintenance activities within the offshore oil and gas sector. Together, KAEFER and Wood Group provided a diverse array of industrial support services, tailored to the specific needs of Equinor’s Mariner Field.

The Mariner A&B contract, along with associated campaign projects, totals over fifty operatives successfully TUPE’d into the organisation, through a carefully planned and seamless transition. Whilst integrating with Equinor’s “I AM SAFETY” campaign, KAEFER have met all agreed targets, whilst transforming some of the ‘habitual’ ways of working that had become a frustration under the previous incumbent contractor.

Our mission is clear: to be the most reliable and efficient provider of technical industrial services.
