Our mission is clear: to be the most **reliable** and **efficient** provider of **technical** industrial services.

KAEFER UK & Ireland provides a large and growing range of industries with asset integrity services including access solutions, insulation, electrical, inspection & testing, protective coatings, asbestos management and more. We focus on improving energy efficiency and extending asset life cycles.

The company has twelve operating centres across the UK & Ireland, employing approximately 3,500 highly skilled and experienced people.

Our people are our lifeforce and every day they deliver excellence to our customers.

KAEFER UK & Ireland is part of the KAEFER Group, a global €2.3 billion business with its headquarters in Bremen, Germany. KAEFER works on more than 5,500 job-sites internationally, with around 33,000 employees. With unrivalled experience and expertise, our teams provide trusted partnerships and tailored support to execute even the most challenging and complex projects for clients.

Our UK & Ireland Defence Business

Supporting the UK's National Shipbuilding Strategy, fleet operations, and defence infrastructure.

At KAEFER, we deliver the highest marine support services which help to underpin the effectiveness of the UK's maritime defences.

We proudly delivery our world-class industrial services at dockyards across the UK and Ireland, supporting some of the biggest names in shipbuilding and defence infrastructure.

The industrial services frameworks and projects for our Defence clients deliver a range of value-for-money solutions for the maintenance and support of Royal Navy ships, submarines, and full dockyard services.

KAEFER and clients work together towards shared objectives of improved service and quality, bringing resilience to the business and certainty of delivery.

We understand the unique demands and challenges of this industry, and we have the expertise and experience to drive value for customers and shareholders. Our team is committed to delivering the highest level of quality and service to the industry.

Count on us for Technical Industrial Services

We ensure the integrity, value, and longevity of our clients' assets in the defence sector. With unrivalled experience and expertise, our teams provide a trusted partnership and tailored support to deliver the most challenging and complex projects for our clients.

ACCESS SOLUTIONS

Providing industry leading services that ensure projects are executed safely and in compliance with all legislative requirements.

ROPE ACCESS

Either providing highly competent rope access specialists, delivering comprehensive IRATA Training or as a combination of both.

INSULATION

Delivering knowledge, experience and flexibility on the most complex and large-scale projects.

SURFACE PROTECTION

Mitigating corrosion, enhancing functionality and extending asset life.

PASSIVE FIRE PROTECTION

Developing and implementing systems that provide the highest safety levels, protecting both people and property.

NDT & TESTING

Ensuring the integrity of assets through conventional, advanced and specialist non-destructive testing (NDT).

MECHANICAL & ELECTRICAL

Offering a vast range of mechanical and electrical services to some of the most high-profile energy projects across the globe.

HVAC & METAL FABRICATION

Employing some of the most experienced tradesmen in the industry to provide best in practice delivery on energy projects around the world.

DEW POINT REDUCTION SYSTEM

KAEFER's patented technology utilizing advanced dehumidification equipment, the Dew Point Reduction System (DPRS), is a portable dehumidification system that uses the latest state-of-the-art 'Dry Air' technology.

The system allows inspection and remediation activities to be undertaken on insulation running at cryogenic temperatures without the need to shut down the plant: allowing piping and vessel maintenance teams to carry out work activities previously unachievable on live plant.

BLU - REAL-TIME CUI MANAGEMENT CONTROL

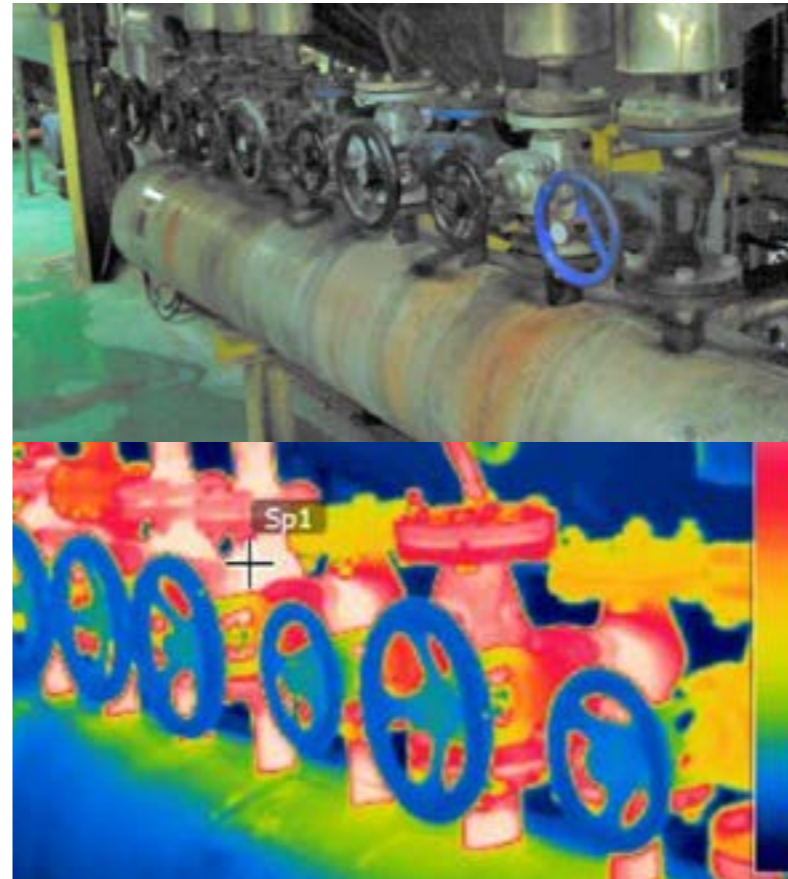

blu, empowered by KAEFER, is a cutting-edge solution designed to tackle Corrosion Under Insulation (CUI) challenges through real-time, data-driven monitoring.

Using advanced sensors, IoT technology, and robotics, Blu enables continuous assessment of assets, allowing for predictive maintenance and early issue detection.

This proactive approach helps enhance safety, reduce maintenance costs, and extend asset life, while supporting sustainability efforts.

Products & Services

ENERGY AUDITS

KAEFER offers specialised energy audits to identify areas of energy loss and offer customised solutions.

Utilising KAEFER's own Thermo Technical Calculation Software (WTB), KAEFER undertakes inspections on clients' assets to determine heat loss. Following the inspections, KAEFER Insulation Specialists compile reports, complete with detailed analysis.

THESE REPORTS INCLUDE:

- Alternative insulation/cladding material recommendations
- Insulation of unprotected areas prone to energy loss.

Case Studies

MARINE

Babcock International, T31 Frigates

Client: Royal Navy / Babcock International
Location: Govan / Scotstoun

Throughout the 4-year contract, KAEFER is responsible for applying 510,000m² of specialist coatings to ensure the frigates meet the Royal Navy's high standards. This work ensures protection against corrosion and long-term structural integrity for the vessels.

[Read More >](#)

BAE Systems, T26 Combat Ships

Client: MOD / BAE Systems
Location: Govan / Scotstoun

KAEFER UK & Ireland is providing specialist insulation products and installation services for the first three UK City Class Type 26 Global Combat Ships for client, BAE Systems. Throughout the contract, KAEFER will install over 90,000m² of insulation throughout critical ship components.

Babcock International, Bibby Polaris

Client: Babcock International
Location: Rosyth

KAEFER UK & Ireland worked closely with Babcock to plan and overcome interfaces on critical path items, supporting the refit of the Bibby Polaris vessel.

[Read More >](#)

Hartland & Wolff, SeaRose FPSO

Client: Husky Energy / Harland & Wolff
Location: Belfast

KAEFER UK & Ireland worked with Harland & Wolff to provide surface protection, painting and access services on SeaRose FPSO while she was in drydock.

[Read More >](#)

Aircraft Carrier Alliance & Babcock Marine, Queen Elizabeth Class Aircraft Carriers

Client: Royal Navy / Aircraft Carrier Alliance & Babcock Marine
Location: Rosyth

KAEFER UK & Ireland provided a wide range of technical industrial services as part of the construction phase of two Royal Navy aircraft carriers. Our focus was on providing highly capable project management and supervision to ensure timely completion of all of the contract deliverables.

Focusing on Customer Value

FOCUSING ON CUSTOMER VALUE

LEAN is working. Not just for our clients, but for us as well.

Simply put, LEAN means creating more value for our clients as well as for our teams. This is achieved by generating as close to zero waste as possible by optimising processes and continuously improving them.

The idea is to waste less time, effort, and materials. We call getting things right the first time, heading towards 'True North'.
