OUR UK & IRELAND ENERGY BUSINESS

With unrivalled experience and a track record for outstanding delivery across both onshore and offshore projects, the KAEFER UK & Ireland Energy Business supports clients across these geographies with market leading Asset Life Extension, End of Life Maintenance and SIP Maintenance programmes.

Headquartered in Aberdeen and with a pedigree delivering in Scotland – the KAEFER UK & Ireland Energy Business is the partner of choice to the energy sector working with many of the industry’s most respected names across gas plants and offshore oil and gas platforms. The business prides itself on working collaboratively with clients to develop new technologies, improve processes and increase efficiencies and, with service levels delivered by the very best and most highly specialised industry talent, the KAEFER UK & Ireland Energy Business ensures your assets are safe and maintained throughout the full project life cycle.

WHEN IT COUNTS, COUNT ON US

OUR CORE SERVICES

Our technical industrial services ensure the integrity, value, and longevity of our clients' assets. With unrivalled experience and expertise, our teams provide a trusted partnership and tailored support to deliver the most challenging and complex projects for our clients.

ACCESS SOLUTIONS

Providing industry leading services that ensure projects are executed safely and in compliance with all legislative requirements.

ROPE ACCESS

Either providing highly competent rope access specialists, delivering comprehensive IRATA Training or as a combination of both.

INSULATION

Delivering knowledge, experience and flexibility on the most complex and large-scale projects.

SURFACE PROTECTION

Mitigating corrosion, enhancing functionality and extending asset life.

PASSIVE FIRE PROTECTION

Developing and implementing systems that provide the highest safety levels, protecting both people and property.

NDT & TESTING

Ensuring the integrity of assets through conventional, advanced and specialist non-destructive testing (NDT).

MECHANICAL & ELECTRICAL

Offering a vast range of mechanical and electrical services to some of the most high-profile energy projects across the globe.

HVAC & METAL FABRICATION

Employing some of the most experienced tradesmen in the industry to provide best in practice delivery on energy projects around the world.

FABRICATION

Our fabrication services ensure the integrity, value, and longevity of our client's assets.

With unrivalled experience and expertise, both onshore and off, our teams provide a trusted partnership and tailored support to deliver the most challenging and complex projects for our clients.

Whether working in hazardous environments, or delivering complex projects on tight schedules, our team has the skills and expertise to get the job done safely, efficiently, and to the highest standards.

KAEFER UK & Ireland's fabrication facility in Jarrow, Tyne & Wear manufactures precision-engineered, steel ductwork and HVAC for clients across the UK & Ireland.

DEW POINT REDUCTION SYSTEM

KAEFER's patented technology utilizing advanced dehumidification equipment, the Dew Point Reduction System (DPRS), is a portable dehumidification system that uses the latest state-of-the-art 'Dry Air' technology.

The system allows inspection and remediation activities to be undertaken on insulation running at cryogenic temperatures without the need to shut down the plant: allowing piping and vessel maintenance teams to carry out work activities previously unachievable on live plant.

KAEFER ENERGY PRODUCTS

The KAEFER Energy range of products offers insulation for heat, cold, noise, fire, thermal, and cladding.

Effective fire protection is an essential part of any offshore installation. ENERGY Firecover® is a new and innovative firebox for valve and flange protection. It extends the functionality of the system, giving personnel valuable time to control the situation or, if necessary, evacuate the facility in the event of a fire. The firebox is DNV type approved.

[Find out more >](#)

From ENERGY PipeProtection™ which protects cladding on insulated pipes when the only option is for a worker to step on an insulated pipe, through to the ENERGY Cryocover™ which is combination tested and certified to protect against cryogenic leakages/spillages and jet fire, there's a KAEFER Energy product to support your needs on site.

blu
Empowered by KAEFER

blu is the global business problem solver that builds on KAEFER's experience in the CUI marketplace to offer a fresh way of interpreting data.

- ▶ With blu you can turn the unpredictable into the predictable, meaning not only improved safety, reduced costs, and a more sustainable answer, but a better view of the future.
- ▶ From reactive to preventative maintenance with the use of sensor data. Provides regular online information to be analysed and used for CUI predictions.

[Find out more >](#)

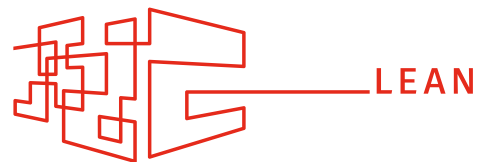

- ▶ Data transfer, analysis, and reporting.
- ▶ Sensors installed on pipes with selected distance.
- ▶ With digitized, sensor driven IOT, with robotic solution for sensor installation.

CONCENTRATED EXPERTISE

The KAEFER UK & Ireland Energy Business is underpinned by a team comprising some of the most highly respected and industry recognised professionals. Providing market leading Asset Life Extension, End of Life Maintenance and SIP Maintenance programmes to some of the most high profile and respected onshore and offshore energy projects, the KAEFER UK & Ireland Energy Business prides itself on providing the highest quality solutions across one of the most regulated and demanding industries.

An extensive and highly experienced Technical Excellence Team – operating out of the company's Aberdeen headquarters – also ensures rapid mobilisation to meet client needs, providing unrivalled and industry leading capabilities across CUI, painting, scaffolding, insulation and rope access solutions underpinned by market leading health and safety, quality and environmental processes.

FOCUSING ON CUSTOMER VALUE

LEAN is working. Not just for our clients, but for us as well.

Simply put, LEAN means creating more value for our clients as well as for our teams. This is achieved by generating as close to zero waste as possible by optimising processes and continuously improving them.

The idea is to waste less time, effort, and materials. We call getting things right the first time, heading towards 'True North'.
