

Saipem Offshore Asset Integrity

KAEFER UK & Ireland provided onshore and offshore Oil & Gas support to Saipem Ltd. as part of a five-year contract until 2024.

The contract is the most recent example of KAEFER UK & Ireland's long-standing support to Saipem, stretching back to 2012. The five-year deal sees KAEFER perform mainly vessel maintenance and project work scopes.

Multi-skilled KAEFER operatives improve efficiency, reduce headcount, and reduce cost. KAEFER can deliver critical path tasks ahead of programme due to detailed pre-construction and on-job, innovative scaffold design.

The project so far has been full of successes, with notable highlights including the completion of the BP Miller project, and the kick-off of major vessels such as the S3000s and Blue Tern.

Our mission is clear: to be the most reliable and efficient provider of technical industrial services.
