

CATS TERMINAL

For over seven years, KAEFER UK & Ireland has provided safe and reliable services at the CATS Terminal, supporting Wood with scaffolding, coatings, electrical work, and more.

Our working relationship at the CATS Terminal began in 2016, and since then, we've supported the Wood team with enhanced operational efficiency through timely service delivery.

A team of 16 multi-talented KAEFER UK & Ireland workers provide the site, which produces approximately 26% of total UK domestic gas production, with a can-do attitude.

Our mission is clear: to be the most reliable and efficient provider of technical industrial services.
